Cutting down a significant oak tree without a permit is a big no no. To grant them an **after the fact permit is unforgiveable**. The fact that they want to take down even more significant trees - **especially** to put in a road is absolutely unconscionable. The site is not conducive to the amount of construction sought. It is totally ridiculous to have yet another street intersecting with Santa Cruz Ave is itself idiotic, especially since there has been a Task Force involved in trying to remediate the already dangerous conditions on that area of Santa Cruz Ave in the vicinity of the "Y".
